

Build Your Own Jarvis: Full Toolkit

Everything mentioned in the video, in one place. It's mostly **Claude Code** plugged into apps you already use, one connector at a time. I personally use most of these tools day to day.

btw an MCP (a.k.a connector) is a direct line between Claude and one app

#	What you're building	Tool to use	Alternatives
1	The Jarvis dashboard	Just drop in a screenshot to Claude Code	
2	Talk to it + British voice	<code>/voice</code> (to talk TO it) + ElevenLabs (for it to talk BACK in Jarvis voice)	
3	Let it use your browser	Claude for Chrome	Playwright MCP (advanced)
4	Track revenue	RevenueCat MCP	
5	Auto-post content	Buffer MCP	Postiz MCP
6	Instagram analytics	Meta developer app + token, handed to Claude	
7	Read + run ads	Meta Ads connector	
8	Read your inbox	Gmail MCP	Google Workspace CLI
9	Answer customers in your voice	Give it access to your business knowledge base using markdown files	
10	A team of specialized agents	Subagents	
11	Run it before you wake up	Routines via <code>/schedule</code>
